Resource Central is developed by Add-On Products and used for resource management, synchronizing with Microsoft Outlook® and an Exchange Server. Resource Central helps organizations to define, manage and maintain their resources in small organizations with one location and in Enterprise organizations with many geographical locations. It also provides an integrated solution for authorized users to arrange meetings and events along with extra service orders through a customizable user-friendly interface which can track the status of orders.

Yours sincerely
The Resource Central Team

Create a new meeting request in your Outlook calendar using the Resource Finder Add-in. Open the Resource Finder or start by filling in all the needed information for your meeting – such as:

- Subject
- Time slot
- Attendees
- Agenda

Figure 1. Room Booking - Outlook Desktop

Figure 2. Room Booking - Outlook on the Web

**NOTE**: For better illustration, the Outlook desktop client will be used (instead of Outlook on the web) to describe all functionalities.

Click on the **ResourceFinder** (RF) **Add-in** button in order to locate the room you would prefer for your meeting.
CHAPTER 2.
Use ResourceFinder to find a meeting room

The RF Outlook Add-in will help you, easily and intuitively, locate the meeting rooms, which will suit your needs.

Control buttons:

- Open Settings
- Booking this resource requires approval by the resource’s delegate. Your request will be forwarded, pending approval.
- You cannot book this resource because your meeting request conflicts with the resource’s booking policies.
- You do not have permission to book this resource.
- View Resource Details
- Add Resource to My Favorites
- View Calendar
- Remove the resource

If the resource list on the screen does not include the resource that you are looking for, click [List more Resources] to have more resources displayed in the list.

On the availability timeline for each resource, you can see the buffer time displayed as a shaded line:

In case you often look for resources in a certain location, you can set a default location to save time. To do that, right click on a location that you want to set as default, select [Set Default Location].

Figure 3. ResourceFinder Add-in
1. Use the **Resource List** to find a meeting room. You can filter the available room based on the Locations, Categories, Capacity, etc., saving you time when searching for the right room.

2. The **availability** of the meeting rooms will be displayed on each resource in the list.

3. Please note the **equipment** attached to the selected resource (icons under the resource name).

4. To select a room, you click on it from the resource list.

**Recurring meetings:**

In case you book a recurring meeting, the availability is displayed as in the following figure:

![Figure 4. Book a recurring meeting](image)

Availability: The availability ratio is displayed when you book a recurring meeting. This will be further explained below.

Apart from the ratio (highlighted in red), there are vertical bars on the left of the panel showing if the resource can be booked or not.

In the example, “Availability: 29/30” means that you are going to book a recurring meeting of 30 occurrences, and 29 of which do not have conflicts.

The green vertical bar shows that the resource can be booked for your recurring meeting. The red vertical bar shows that the resource cannot be booked because the booking does not comply with the resource booking policies and would be declined by Exchange.

If you click on the text ‘Availability’, more detailed information will be presented.
Use ResourceFinder to find a meeting room

Figure 5. Selected rooms in ResourceFinder

Selecting a room will move the room to the outlook appointment and to the selected resources area of the add-in.
CHAPTER 3.
Invite Attendees and complete your meeting request

At any time, you can add attendees to the meeting and the Resource Finder add-in will adjust.

The number of attendees you add to the meeting will directly make an impact on room search: the room capacity in Filter section is automatically changed according to the number of added attendees including the organizer:

Attendees of the meeting are displayed at the bottom of the ResourceFinder Add-in.

The color code shows the availability of the attendees, in which red means that they are unavailable in the selected meeting time and green means that they are available.

Clicking on an attendee’s name will open its calendar as shown in the following figure, on which you can check the attendee’s availability for the meeting:
You need to click [Send] button in order to finalize the meeting request.

Figure 9. Meeting Request

Shortly after this you will receive one or two emails as confirmation of your booking.

One of the emails might be from the Outlook®/Exchange environment and the other one will be from Resource Central.
CHAPTER 4.
Ordering services for your meeting

Ordering services for your meeting can either be done by using the new reservation email or by using My Meetings.

In the email from Resource Central you will find a summary of the reservation regarding the selected meeting room and the time slot. However, you will also find a link which enables you to order associated services for your meeting. This is identified with the “Click here” hyper-link.

When you click on the button you will open up an order form which belongs to the selected meeting room. This will feature the services enabled for this particular meeting room.

You can also open the same order form in My Meetings to order services for the meeting.

Another way to open order form is to click on [Resource Central] button on the upper left corner of the email body (not available for Outlook on the web). This will open the order forms as in the following figure and you can make orders directly from this order form:
Order Form

The order form will feature all the associated services available for the meeting room you’ve booked.
CHAPTER 4
Ordering services for your meeting

Figure 11. Order Form and Shared Order Form opened from [Click here] button

Figure 12. Recurring meeting Order Form opened from [Click here] button
On this sample order form you’re able to book catering services. To order just select the desired number of services and items needed for the meeting.

Other different services could be to register external attendees, order AV / IT equipment or utilize electronic meeting room signs.

Once you’ve completed the order form, click the [Send Order] button.

Hereafter Resource Central notifies all concerned departments / persons about the services you’ve ordered.

**Order Confirmation**

After placing the order you will receive a confirmation email with a detailed summary of your order.

Should you at any point choose to delete or move your Outlook® meeting to another time slot then the selected meeting room and your order will be automatically deleted (if deadline is not reached) or moved (if deadline is compromised).

The departments / person delivering the services will also be informed automatically about the change.

Should you, at any point, want to change any of the services ordered then you need to select the hyper-link [Click here].
CHAPTER 5.
My Meetings

In Outlook® you have another Icon in your toolbar named My Meetings. This application is also a part of Resource Central like the Resource Finder is. The function of My Meeting is to help you keep track of all your orders for your future meetings or create new orders.

My Meetings is accessible:

1. When you open an email, and the My Meetings icon is available on the ribbon of that email.
2. When you stand in your Outlook inbox. Then you can see that My Meeting is accessible from Outlook’s® main panel (this requires Reading Pane is turned on. You can do this by navigating to View tab → Reading Pane → select Right or Bottom).

Click on [My Meetings Add-in], and from the opened add-in panel click [My Meetings] button.

For Outlook on the web, My Meetings is accessible when you open an email, click [More actions] button, scroll down and select [Resource Central] as in the following figure:
Another panel is opened after you click [Resource Central] from the menu. In this panel, [My Meetings] button is available. Click the button to open My Meetings window from Outlook on the web.
My Meetings navigation

On the left side of the window you will find the date picker area where all the dates on which you have booked a meeting will be highlighted in bold.

In the main section of the window you will find all the meetings listed for the date which has been selected.

From here an order can be changed, created or deleted just by clicking any of the listed meetings.

Again, the appropriate order form will be opened, and you can, as described earlier, select the services or the changes you want for the meeting.

Click on [Order Status] to see status of the order you selected.
Deleting Order associated with Meeting(s)

You can delete one or more order(s) associated with meetings in My Meetings window by selecting the checkbox against one or more meetings and clicking the Delete Orders button.

[Image: Delete Orders Button]

Cancelled Order Email will be sent to meeting organizer and all persons related to the order. Also, the Check symbol (✓) against that reservation for the Order column would also be removed.

**NOTE:** Those Servings in the order of a reservation in which any of the Item(s) has status = Arranged and/or Locked, will not be deleted from the system. Only those Serving(s) in which the Item(s) have status = New, Changed, Confirmed or Declined, would be removed from the selected meeting(s) and corresponding Cancelled Order emails would be sent to the relevant stakeholders.

Managing Visitors

You can manage all visitors in My Meetings by clicking [My Visitors] button, which will open the visitors list in the selected date:

[Image: My Meetings – Visitors list]
### Button | Description
--- | ---
**New Visitor** | Add a visitor to a meeting or a person/user
**Delete Visitor** | Delete the selected visitor(s)
**My Meetings** | Go back to My Meetings list

Clicking on [New Visitor] enables you to add a new visitor to a meeting or a person:

![Visitor Details](Figure 20. Add a visitor to a meeting/person)

Fill in necessary information and click [Save] to finish.
CHAPTER 6.
Add-in Settings

From the main screen of ResourceFinder or in My Meetings, you can open Add-in Settings by clicking on the cogwheel icon at the upper right corner.

In Settings panel, configurations for language, assistant organizer function and datetime format can be made.

Language Setting

You can make configurations for Language to be used in ResourceFinder by clicking on the [Settings] icon at the upper right corner of the interface. The following panel shows up:

Click [Apply] to finish.

Assistant Organizer

In order to enable other organizers like secretaries or Personal assistances to book meetings and place orders in RC on behalf of other organizers, Resource Central provides an additional feature, namely “Assistant Organizer”.

The feature allows the organizer to assign all related work to the assistant as the notifications can be directed directly to the assistant who will correspond with the different service providers on the different service orders.

The assistant with access to the organizer’s calendar can also schedule the meeting directly in the organizer’s calendar and assign all notifications to the assistant.
Enabling the feature in Resource Finder

If this function is enabled by the parameter, the icon Assistant is not available in the **ResourceFinder → Order Form**. It is only available after the function is enabled in **ResourceFinder Settings**.

When this function is enabled in the system, the icon Assistant needs to be activated in the **ResourceFinder Settings**.

Under Default Assistant, you can setup an assistant organizer that will be used as standard on all your orders. E.g. if all your meetings are always handled by the same assistant.

You can also set up a default email flow (who will receive notification emails) by selecting from the drop down list:

After clicking **[Apply]**, the icon Assistant is available in **ResourceFinder → Order Form**. But it is only applied to the booking if you click on it.

Enabling the function will make the assistant organizer available in the **ResourceFinder → Order Form**: there will be a section in the order form named "Meeting Organizer" on top when you make a booking:
The options (assistant and email flow) established previously in ResourceFinder Settings will be displayed here. You can make change according to any need of the particular meeting or disable it if it is a meeting, where you do not need an assistant organizer.

The function is also available in My Meetings where the organizer can see who is the assistant on different meetings and the assistant can see the meetings of different organizers that the assistant supports.

This is what the primary organizer (in this example, it is John Smith) sees in My Meetings:

![My Meetings opened by Primary Organizer](image1)

This is what the assistant organizer (in this example, it is Sensi Haulkner) sees in My Meetings:

![My Meetings opened by Assistant Organizer](image2)
DateTime Format

You can also set up date/time format in Settings panel.

Go to Settings and roll down to the bottom of the panel, you will see the DateTime Format section.

Select your preferred Time Format, Date Format and Date Separator, then click [Apply] to finish.
